

# Global Space Challenge 2025

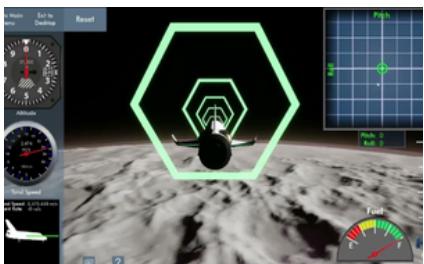

Led by Dr. Greg Chamitoff, a former NASA Astronaut, **Global Space Challenge 2025** gives middle and high-school students an incredible opportunity to design and experience their own space mission using the most advanced virtual space simulation platform available.

**October 3-10, 2025**

Join us as the next generation of space enthusiasts compete with other students around the globe to virtually design and execute an exciting planetary mission.

- ▶ 6 exciting days of live webcasts, learning modules, and space engineering simulations
- ▶ Daily mission training from astronauts, scientists, and select industry experts
- ▶ Tested and proven program, experienced by thousands of students around the world
- ▶ Built on a space mission design platform used for NASA programs

**The Global Space Challenge is exciting, engaging, and easy to join.  
Teams compete for the best mission design and win prizes.**
